

# DOCMAN

VANTREE DOCUMENT MANAGEMENT SYSTEM FOR **SAP** Business One

Gain new accuracy and efficiency with the power to monitor and manage your EDI documents

The Vantree SAP Document Management System (DOCMAN) helps you securely and reliably process EDI/EC documents in and out of SAP Business One. This integration and management tool complements our EDI Network, allowing users in SAP Business One to preview EDI documents. Once they are synced with DOCMAN online, you can correct or reject documents from trading partners, particularly if they have been incorrectly delivered or fail a compliance check. Along with a historical view of the transaction log, DOCMAN provides a comprehensive list of business rules that you can apply to documents before processing them.

## FEATURES

- Robust compliance checking
- Seamless document import/export
- EDI document tracking
- Easy document correction and rejection functionality
- Transaction auto-acknowledge capability
- Integrated with the Vantree EDI Management Suite
- Process and deliver EDI and non-EDI transaction sets
